

“The Sensei PPM Beacon solution enables us to compare active projects for their relative health. These checks allow us to measure projects of different size, scope and location providing a positive light for project managers and predictable project performance for leadership.”

Terry Snapp – Global Product Development Process Leader, Hyster-Yale

Hyster-Yale is a materials-handling equipment company based in Cleveland, Ohio, with subsidiaries around the world. It designs, engineers, manufactures, and sells a wide range of electric and internal combustion engine lift trucks for indoor and outdoor use.

SITUATION

Hyster-Yale leadership needed a better overview of resources and capacity across 5 global development centers and more than 200 simultaneous projects. It adopted Microsoft Project Online to improve resource allocation, project visibility and delivery at all locations.

BENEFITS

- ❖ Better insights to make informed decisions to adjust allocation of resources across multiple projects
- ❖ Improved quality of planning process due to better time tracking
- ❖ More visibility across functional teams
- ❖ Predictable project completion
