

“Sensei PPM Beacon is the most comprehensive and complete solution for Microsoft Project Online available today. We’ve evaluated many versions and implementations of Project Server and Project Online solutions to arrive at that conclusion.”

Roger Young – Vice President, Project Execution Office, MHS

MHS is a single-source provider of turnkey parcel handling automation solutions, able to handle virtually all aspects of distribution center projects in-house, from system design and fabrication to controls, installation and aftermarket support.

SITUATION

MHS required a PPM solution to allow them to gain visibility into key milestones on customer installations, work planned and delivered on the critical phases of their projects and trends across work streams, customers and project phases.

BENEFITS

- ❖ Full transparency of all work across the entire organization
- ❖ Empowers team members to manage deliverables and workload; and facilitates collaboration on issues
- ❖ Consistent and best practice methodology for managing internal and customer facing projects
